
Pretec introduces the world's largest capacity 1.5 GB, 2GB and 3GB CompactFlash Card

Las Vegas, NV, November 18, 2002 - Pretec Electronics Corp., the innovative and quality flash disk manufacturer since 1993, today introduced 1.5 gigabytes (GB), 2GB and 3GB CompactFlash™ Card (CF), the highest capacity of any small form factor flash memory card in the world. The new devices offer great solution for the need of high storage capacity dictated by the ever increasing demand for storing large digital content files, such as audio, digital still and video images.

The highest capacity CF card currently available in the market is 1GB, also available from Pretec. The demonstration of the 1.5GB CF card will be shown at Pretec booth #11258 at Central Hall, LVCC. Samples available immediately. 2GB and 3GB CF cards from Pretec will be demonstrated at Pretec private suite in Comdex by invitation only. 3GB CF card will be priced at \$2499 for sampling quantity by the end of this year.

Industrial and military grade 1.5GB, 2GB, and 3GB CF cards are also available from Pretec. Designed with precision mechanics, and full metal protection, the breakthrough product sustains a wide range (-40°C~125°C) working temperature and offers ultimate level of new data protection and security features to prevent user's image files, software, crucial data and products from being damaged. The card supports ATA/True IDE standard and consumes low power when operating, ideal for the applications used in harsh environment such as military aircraft, medical instrumentation, transportation vehicles, test and measurement equipments. The new ruggedized 1.5GB, 2GB and 3GB CF cards are another excellent track record of Pretec's relentless pursuit of innovation.

About Pretec

Pretec™ Electronics Corp. (<http://www.pretec.com>) offers a complete spectrum of small form factor memory cards and card readers such as ATA/CF card, IDE & Mini-IDE Flash Drive (MIDE™), SmartMedia™, MultiMedia Card™, and SD Card for the digital imaging, mobile computing, and Military/Industrial Control markets; and is the creator of Innovative CompactI/O™ cards for PocketPC™, digital cameras and many IA devices.
